
**Illinois Commerce Commission
Joint Electricity, Gas and Consumer
Policy Committee Meeting
Illinois Energy Efficiency Programs
Springfield, Illinois
June 25, 2013, 1:00PM**

Today's agenda will feature discussions by various groups who help to shape the Energy Efficiency programs and policies in the State of Illinois. The following topics will be addressed to varying degrees by all panels:

- Exploring the additional efficiencies that might be gained by further EE offerings, separated by customer class.
- What innovative programs have been successful in different states?
 1. How might we implement those programs here in IL?
 2. What obstacles exist to prevent the adoption of these EE programs?
 3. How might we address, mitigate or resolve the obstacles?
- How might cooperation between electric and gas utilities be increased to maximize the effectiveness of the EE programs?
- How can utilities specifically target customers who need energy savings the most (low income). What low income programs already exist?
